## Elden Ring [Updated] 2022

The game system introduces the ability to fuse the characters of the main character and other main characters or your own character into one powerful character. Additional physical power can be gained by selecting the components of the character that are of the same element as the original character's element. The fusion, along with the absorbed power, will be present for the whole of your current game; even if you are playing during an interruption or lengthy break in the game, a level is required to start a new game, so the fusion will stay complete. In addition to the main characters, you can select one of the three supporting characters who can be seen in the game screen. The three supporting characters, along with the fusion of the main characters, can also be selected as main characters. The fusion of the supporting characters can be done at the usual rate of main characters. After the fusion, the game will start with the newly fused main character. There are three supporting characters in the game. You can select each one in a separate menu screen. The table below shows the details of the three supporting characters. (The Japanese text is underline.)

- Your Friends in the Game Other main characters who you have saved in your info window while playing the game will appear as your friends for convenience during the game. The above-mentioned 3 supporting characters can be upgraded up to level 10. The 3 supporting characters will join you in battle once you reach up to their level, while the main character will follow suit immediately after reaching their level. The 3 supporting characters will not be involved in battle in the early game, but will appear in the battle once the main character reaches their level. However, their level of power is at the level of the weak characters. The numbers shown in the table are the level of the characters after you promote them to the next level.
